## MONTHLY NEWSLETTER

ISSUE 2

APRIL 2017

Hello and welcome to Issue 2 of our monthly newsletter. Its been a busy month at Modplan with various developments taking place. There has been a lot of tendering taking place, with some projects looking promising, so watch this space!

### THE SAFETY BLITZ

Working at height remains one of the biggest causes of fatalities and major injuries. Common cases include falls from ladders and through

fragile surfaces. 'Work at height' means work in any place where, if there were no precautions in place, a person could fall a distance liable to cause personal injury (for example a fall through a fragile roof).

Therefore this month our Site Managers, where appropriate, will be carrying out a tool box talk on the subject. **THIS IS A PLATFORM TO GET IT RIGHT AT HEIGHT & NOT TO BE A FOOL & FALL!**
